

Newsletter No7/December 2007 – NON-TOXIC UPDATES

Dear Printmakers,

Since I published my last newsletter in January 2007 I finally received my new Handbook of Non-Toxic Intaglio from the printer – I am very happy, it took time but it was worth waiting for – the result is just as beautiful as I hoped after having changed the layout of the book. The book has now been published in Danish, Flemish/Dutch and Spanish language versions. The French version follows very soon.

NEW HANDBOOK OF NON-TOXIC INTAGLIO

1. My brand new and completely updated “**HANDBOOK OF NON-TOXIC INTAGLIO**” will be published January 1st 2008 – by ordering now and before January 1st you will get the book with 10% discount and free shipping.

Normal price: US\$ 42 - GB£ 21 - EURO 30 - DKK 225

Orders before January 1st 2008: US\$ 37.80 – GB£ 18.90 – EURO 27 – DKK 200

inclusive of free shipping. (EU countries exclusive of 25% VAT)

What's is new?

Since the first edition was published 5 years ago, the new book has been radically updated with regards to the layout, new ways of de-greasing, new non-toxic etching grounds (“Brush-On Hard Ground”, and the “Slow Drying Soft Ground), new ways of laminating the photopolymer film, spit bite techniques based on the use of photopolymer film/plates, digitally generated stencils for photogravure, recommended printers for halftones, equipment for intaglio printmaking, printing with traditional and water based etching inks and a new appendix describing all working techniques involved in applying acrylic etching grounds onto zinc plates and how to etch zinc safely. You will find more information about the book on www.artbag.dk and the enclosed pdfs: “**Content of the Book**” and “**Fact Sheet**”

SUMMER WORKSHOPS 2008

2. My summer workshops in my studio in Spain are already planned – they will take place as follows: June 29th - July 6th 2008 and August 2nd - August 10th 2008 – you will find more information on my homepage www.artbag.dk > grafisk eksperimenterium > workshops

UV-EXPOSURE UNIT

3. I have designed a new cheap **UV-LIGHT BOX** ready to assemble and place on top of a cabinet. The complete light box with 300 Watt UV bulb and fittings is beautifully made of brushed aluminium. The shutter is prefabricated in laser-cut aluminium with automatic stop function ready to fix on the top of the cabinet with the 4 screws included. The light shield is assembled in less than 2 minutes with the included 4 bolts.
For more information: Click homepage www.artbag.dk > grafisk eksperimenterium > click shop > click materials and equipment > click INFO under “UV exposure unit with lamp ready to use”

If you are in doubt about anything – please send me a mail!

My newsletters are published in English and Spanish language versions – if you do not want to receive my newsletters in the future – just tell me by mail.

I wish you all a merry Christmas and Happy New Year
Henrik Boegh
